

Seminar:
X-ray diffraction and its application in the investigation of crystalline materials
- May 31st-June 3rd 2010, Belgrade-Ivanjica -

Inquiry

	Mark (1-5)	Remarks
Quality of the content of the lectures	4.94	Excellent, sistematic aproach
Quality of the lecturers	4.89	- Basic rules of preparing presentations were not followed; -Excellent lecturers.
The program and organization	4.61	
A general quality of the seminar	4.61	Little bit more subjects
Special impressions, comments, etc.		<ul style="list-style-type: none"> - Very usefull for cooperation of the scientists with different backgrounds; - Good themes and good organization, thank you; - The course was not announced effectly, so there are some young people who needed these information but who did not know about the seminar; - Just contiune this way, it would be useful to have more seminars like this one; - Fantastic! Usefull seminar for those who have good background in crystallography and for those to whom this method is not well known; - Again a seminar of good quality organized by RESTCA. Thank you! - Very pleasant atmosphere;

MARKS: 5 – excellent, 4 – very good, 3 – satisfactory, 2 – unsatisfactory, 1 - bad
